

QUALITY MANAGER

Get A 360° View Of Quality From Audits To SPC, Checks, & More

SafetyChain Quality Manager puts busy quality teams in control of their yield, costs, and program compliance with a fully-integrated Quality Management Software (QMS) solution. Real-time spec verification with SPC, paperless quality checks, automated audits, fully digital CAPA & RCA, and even customer complaint management, SafetyChain is the only end-to-end QMS purpose built for process manufacturers.

Eliminate Paper & Unlock Critical Quality Program Data

Quickly, easily, and accurately collect critical safety and quality data on any device (tablet, PC, or workstation) with a single submission that instantly syncs with your ISO, GFSI, FSMA, HACCP, SQF and other regulatory plans, plus customer requirements and certification programs like kosher, vegan, and organic. Save valuable time and ensure your records are always safe, stored, and accessible for your team or disaster recovery.

Key Benefits

Save time & eliminate paper

Automate audits

Improve on-time shipments

Faster spec verification

Ensure compliance

Digital CAPA and RCA

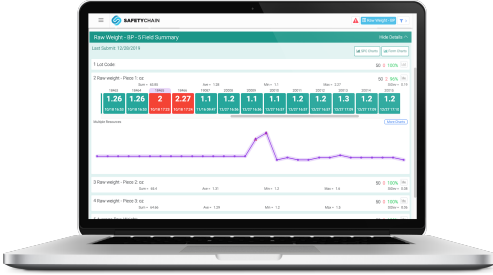

Cloud storage & traceability

Enterprise roll-up reporting

Works offline, without WiFi

Manage customer complaints

Reduce Waste, Rework, & Returns

Identify potential non-conformance issues faster with real-time verification to ensure all product leaving your facility meets internal and customer specifications. Reduce waste and rework, improve on-time shipments, and get fewer complaints from happier customers.

Automate Internal And External Audits

With a single click, create a fully auditable record with every form submission for every plant across the enterprise. Records are instantly available for selected team members to review, sign off, and report on or share selected records using Secure Profiles for customers, auditors, and even regulatory agencies. Eliminates 80% of your preparation time instantly.
