

Open top skinner

Townsend Membrane Skinner OTM50

- Improves yield and throughput
- Maximizes operator efficiency
- Low cost of ownership
- Improved safety features

New, improved open top skinner

From the global leader in skinning

The OTM50 is Marel's newest open top machine from the Townsend skinner line.

The OTM50 removes membrane from pork, beef and a number of other species without the loss of valuable meat.

Building on the success of the SK 11 models, the new OTM50 improves yield, increases throughput, maximizes operator efficiency and significantly reduces the time needed for sanitation and maintenance, all in the safest possible manner.

Machine dimensions

Width	Length	Height
844 mm	723 mm	975 mm

Applications

Model	Process	Application
OTM50	Membrane removal	Pork and beef
